EXPERIENCE

[RemoteMore](#)

Freelance/Remote

Full-Stack Developer

March 2023 - Present

- Developing a full stack event manager service that allows operation controllers to construct stalls for a certain event and rent them to registered clients.
- Developing a microservice to notify operation coordinators about breakdowns during an event.
- Completed advanced Redis course, advanced RabbitMQ course

[Kiwibot](#)

Berkeley, California, United States /Remote

Full-Stack Developer (Midlevel-2)

November 2021 - February 2023

Kiwibot is a delivery business that uses self-driving robots to make food and package delivery more efficient, convenient, and environmentally friendly.

- Utilized agile methodologies and SOLID principles to partition a monolithic system into three distinct microservices, resulting in a remarkable 55% reduction in maintenance expenses and a substantial 40% enhancement in performance.
- Collaborated with notable industry players including Grubhub Sodexo, Aramex, Careem, and IBM to gather diverse insights into delivery assignment workflows. Skillfully assessed requirements, thereby adapting and integrating existing services seamlessly with clients' systems to deliver successful outcomes.
- Created Restful API documentation for partners to visualize delivery completion workflow along with the integration process. That downsized the integration process from 15 days to 3 days.
- Created a ticketing system mainly for operation coordinators to take action on product delivery failure. It helped to reduce customer support time on failure scenarios by 60%.

[YouMeWho](#)

East Palo Alto, California, United States /Remote

Full-Stack Developer (Midlevel-2)

August 2021 - November 2021

YouMeWho is a platform for Facilitating sales by curating and sharing product lists for seamless client contacts.

- Built over 20 features like payment process, customized template for selling items, included functionalities for blacklisting suspicious customers, and integrated interactive search. Which resulted in increasing customers by 12%
- Defined three distinct packages and created subscription flow by considering monthly and yearly fees with referral codes.

Full Stack Developer

February 2021 - May 2021

- Crafted an innovative browser extension that significantly boosted business revenue by an impressive 20%. This achievement was realized by effortlessly importing data from various web sources, leading to a substantial impact.

[Softzino Technologies](#)

Dhaka, Bangladesh / Remote
